Alternate: bkscreations49@yahoo.com

---

### PROFESSIONAL SUMMARY

Independent developer and multidisciplinary creator working across web development, automation, AI integration, and visual storytelling. Builds connected digital experiences with attention to both the systems behind the product and the way people experience it. Brings a practical, project-driven approach to turning creative concepts into working websites, workflows, and platforms.

### CORE CAPABILITIES

- **Web development:** Python, Flask, Astro, JavaScript, TypeScript, responsive interfaces
- **Systems & infrastructure:** Linux, Nginx, Gunicorn, APIs, deployment
- **AI & automation:** AI integration, automated workflows, generative image and video workflows
- **Creative direction:** visual identity, storytelling, character development, worldbuilding, multimedia production
- **Media tools:** FFmpeg, image and video production workflows

### INDEPENDENT EXPERIENCE

#### Independent Developer & Creative Systems Designer

Self-directed projects and freelance work

- Develop independent digital projects spanning web experiences, AI-assisted workflows, and creative media.
- Connect application development, server infrastructure, visual design, and content into cohesive user experiences.
- Build and maintain websites using modern web tools and Linux-based hosting.
- Translate creative ideas into practical interfaces, structured content, and supporting technical systems.
- Apply storytelling and visual direction to give digital projects a consistent identity.
- Complete selected freelance work alongside ongoing development of personal platforms and creative projects.

### SELECTED PROJECTS

#### Sage Astrology | Astrology platform

Combines an interest in astrology with application development, interpretation, and digital experience design. Represents a multidisciplinary approach to organizing specialized content and technical systems around a cohesive platform.

#### Black Lantern | Creative media project

Brings together visual storytelling, creative direction, and digital presentation. Extends creative concepts into a broader project identity supported by web and media work.

#### BKS Creations | Independent creative venture

Connects creative production, brand development, and digital project work. Provides a foundation for developing and presenting work across artistic and technical disciplines.

#### Sage Portfolio | sage23.com

Professional portfolio | Astro · Responsive design · Linux hosting

- Built and deployed a portfolio presenting technical projects, creative work, and professional capabilities.
- Organized dedicated project pages, an About page, and a creative section into a consistent site experience.
- Integrated custom portrait artwork with responsive layouts and a cohesive visual identity.
- Validated the site through Astro diagnostics and production builds.

### WORKING APPROACH

Combines technical problem-solving with creative judgment. Focuses on useful, clear, maintainable work - connecting infrastructure, interfaces, content, and visual design with the needs of the people using them.
